Workshops are from 7:30am-12pm

Participants must attend the full workshop to receive professional development points.

To register, visit [www.vacareerview.org](http://www.vacareerview.org). Click on *Fall 2019 Workshop Registration*.

Workshops are divided into two sessions. Choose one presentation to attend during each session.

### Session I

#### Creating a Career-Minded School Community...Be the Catalyst

Inspire teachers, administrators, and school staff to be a part of promoting careers in your school! Preparing students for the world of work requires a multifaceted approach. In addition to exposure to careers, students need to develop skillsets that will give them the tools to be career-competitive in national and global markets. Creating a school community that embraces student career development on a daily basis as part of school culture uniquely prepares students for post-high school career opportunities. This session offers discussion, strategies, activities, resources, and idea-sharing for creating a career-minded school community. K-12 focused.

#### High School...We're Back and Brand New!

Virginia Career VIEW's high school resources are back and better than ever! Discover how to navigate our grades 9-12 brand new website to access career assessments and identify resources that meet college and career planning goals. Resources correspond to Virginia School Counseling Standards and the Profile of a Graduate including the 21 workplace readiness skills and the 5 "C"s: critical thinking, creative thinking, collaboration, communication and citizenship. Learn how to access tools that support multiple paths toward college and career readiness including opportunities for internships, externships, and credentialing. 9-12 focused.

### Session II

#### Building on Strengths and Values: Career Intervention Strategies for Culturally Sensitive Career Education Programs

Discover research-based models for developing career education programs for diverse communities. Career education programming can be enhanced by becoming more culturally informed. Participants will discover and discuss ways to create an intentional and sensitive approach to career education based on local diversity including, but not limited to: Rural Appalachia, ESL families, first generation college students, and more. K-12 focused.

#### Career Development Strategies for Students Living in Poverty\*

Children living in poverty often grow up with limited exposure to the community outside of their own neighborhood, therefore reducing their awareness of a broad spectrum of careers. In career development, it is crucial for children to gain a better understanding of abstract concepts related to their future. This session will touch on the impacts of generational poverty – on students, families, and communities - and provide specific career development strategies recognizing these students' unique circumstances and needs.

\* Please note *Career Development Strategies for Students Living in Poverty* was presented during the 2018 workshop season, and due to high demand, we are offering this session again during the 2019 workshop season.
